

Cognitom formalization

Vityaev E.E.^{1,2}

¹Sobolev institute of mathematics, Novosibirsk, vityaev@math.nsc.ru

²Novosibirsk State University

Annotation. Cognitom formalization performed by formalization of the functional systems cogs and phenomenal experience cogs. This formalization is based on the extraction of the high correlational causal structure of the perceived objects that permits to develop a unified formalization of the “natural” classification, “natural” concepts and integrated information by G. Tononi.
